

The Free Will by Carsten Martin Ploss (© 2010)

God gave us the gift of the Free Will

It comes along with conditions and time

The Will could be related to the past

Or to a Vision of the Future

But our Fantasy, our ideas are endless.

Only in the NOW there could not be any Will

The NOW is a static condition

A Condition of endless possibilities, in which

ALL is NOTHING at the same time, in which

ALL is possible and not possible at the same time

The Will moves out of the Now – into the time

And creates a conditioned Mind

Dependent on the focus and

The laws of causality within

The spectrum of the chosen Reality

The intensity of the Will affects

The probability of the final manifestation

Of your personal Reality

It is your choice – **Always.**
